TESTIMONIALS

"Gone are the days of using Dropbox, WeTransfer and shipping CDs to share our medical imaging. Cloud MRI enables me to easily send our CT scans to other clinics, saving valuable time everyday."

"Cloud MRI's Key Image Notes (KINs) feature actively differentiates our radiology reports from other veterinary teleradiology practices"

"Having the films stored electronically and being accessible to the families and to the orthopedics and radiologists has been a real success story."

"Cloud MRI makes it easy to view my images from my phone or iPad and share them with my clients within moments. It's quick and inexpensive; exactly what I needed."

"Pet owners love the new experience and they share it with their friends and family. This word-of-mouth movement drives new clients for our veterinary practice partners."

"Cloud MRI enables me to read imaging studies taken at my facility in Brazil from anywhere in the world. Currently I'm working out of Paris, but it's as if I'm in the reading room at home."

"We have been thrilled with the success of the Cloud MRI Publisher in providing critical diagnostic information to patients and referring physicians in a coordinated fashion."
